TERMS AND CONDITIONS RELATING TO RESERVED TRANSMISSION EASEMENTS

Texas Municipal Power Agency ("Agency") may use each reserved transmission easement for the purpose of erecting, operating, maintaining and servicing thereon one or more electric power and/or communication lines, each consisting of a variable number of wires, and all necessary or desirable appurtenances, attachments and complete supporting structures, including foundations, guy wires and guy anchorages, and structural components over, across and upon the reserved easements.

Agency shall have the right to construct, operate, improve, reconstruct, increase or reduce the capability, repair, relocate, inspect, patrol, maintain or remove such lines within such easement as Agency may from time to time find necessary, convenient or desirable to erect thereon and all rights necessary or convenient for the full use of the easement, including reasonable access over, across and upon adjacent property to such easement; the right to trim or remove trees and shrubbery to the extent necessary, in the sole judgment of Agency, to prevent possible interference with the operation of such lines or to remove possible hazards thereto; the right to put gates in existing fences within such easement; and the right to remove or prevent the construction of any or all buildings, structures and obstructions within such easement. If any such buildings, structures or obstructions are hereafter constructed or permitted by the owner of the land encumbered by the reserved easement (the "Owner") to exist within the easement without prior written consent of Agency, then Agency shall have the right to remove the same, and Owner agrees to pay to Agency the reasonable cost of such removal. This agreement, together with the other provisions of this grant, shall constitute a covenant running with the land for the benefit of Agency, its successors and assigns. The reserved transmission easement reserved to Agency is severable and may be assigned by Agency to any successor or assignee, either in whole or in part. Agency shall have no right to fence or enclose such easement or to use it for any purposes other than as set out above. The right of the Owner to use its land, including the portion within the easement, for all other purposes that will not interfere with the exercise of the rights of Agency is reserved to the Owner, including the right to use the same for general agricultural and grazing purposes, to erect or maintain fences not more than 8 feet high across such easement, provided that gates or openings 12 feet wide or more are installed therein to provide Agency reasonable access to all parts of such easement; and to lay out, dedicate, construct, maintain and use such roads, streets, alleys, railroad tracks, underground telephone cables and conduits, and oil, gas, water and sewer pipelines as will not interfere with the rights of Agency; provided that all such facilities shall be properly grounded, and shall be so constructed as to provide, with respect to Agency's lines and other facilities, the minimum clearances provided by law and recognized as standard in the electrical industry.

The easement will remain in effect for Agency, its successors and assigns, until all of such lines and supporting structures shall have been completely abandoned and removed by Agency, and no future use of the same is contemplated by Agency, its successors and assigns, and in that event such easement and right of way shall cease and all rights herein shall terminate and revert to the Owner.

Agency shall have the right to construct, operate, improve, reconstruct, increase or reduce the capability, repair, relocate, inspect, patrol, maintain or remove such lines within such easement as Agency may from time to time find necessary, convenient or desirable to erect thereon and all rights necessary or convenient for the full use of the easement, including reasonable access over, across and upon adjacent property to such easement; the right to trim or remove trees and shrubbery to the extent necessary, in the sole judgment of Agency, to prevent possible interference with the operation of such lines or to remove possible hazards thereto; the right to put gates in existing fences within such easement; and the right to remove or prevent the construction of any or all buildings, structures and obstructions within such easement. If any such buildings, structures or obstructions are hereafter constructed or permitted by the owner of the land encumbered by the reserved easement (the "Owner") to exist within the easement without prior written consent of Agency, then Agency shall have the right to remove the same, and Owner agrees to pay to Agency the reasonable cost of such removal. This agreement, together with the other provisions of this grant, shall constitute a covenant running with the land for the benefit of Agency, its successors and assigns. The reserved transmission easement reserved to Agency is severable and may be assigned by Agency to any successor or assignee, either in whole or in part. Agency shall have no right to fence or enclose such easement or to use it for any purposes other than as set out above. The right of the Owner to use its land, including the portion within the easement, for all other purposes that will not interfere with the exercise of the rights of Agency is reserved to the Owner, including the right to use the same for general agricultural and grazing purposes, to erect or maintain fences not more than 8 feet high across such easement, provided that gates or openings 12 feet wide or more are installed therein to provide Agency reasonable access to all parts of such easement; and to lay out, dedicate, construct, maintain and use such roads, streets, alleys, railroad tracks, underground telephone cables and conduits, and oil, gas, water and sewer pipelines as will not interfere with the rights of Agency; provided that all such facilities shall be properly grounded, and shall be so constructed as to provide, with respect to Agency's lines and other facilities, the minimum clearances provided by law and recognized as standard in the electrical industry.

The easement will remain in effect for Agency, its successors and assigns, until all of such lines and supporting structures shall have been completely abandoned and removed by Agency, and no future use of the same is contemplated by Agency, its successors and assigns, and in that event such easement and right of way shall cease and all rights herein shall terminate and revert to the Owner.
